DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 10-25, are drawn to “A method of cooling a plurality of heat generating components”, classified in class 236 subclass 1C or in class 361 subclass 695.
 - II. Claims 26-32 drawn to “The computer readable storage medium having a set of instruction” for temperature control system classified in class 165 subclasses 276, 287, 299, 300, or in class 361 subclass 684, 685 or in class 700, subclasses 299, 300 or in class 711.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of groups I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed, i.e. a computer readable storage medium can be used to practice any another and materially different process, since any sets of instruction for any desirable process may be stored on said medium. Furthermore, sets of instructions for the process as claimed can

Art Unit: 2835

be derived from any another source (i.e. not from the computer readable storage medium). For example said sets of instructions can be inputted manually from the computer keyboard.

3. Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification, and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
